Apropos of Mme. de la Mode, there is evidence that white tulle and lace is the most popular trimming for chapeaux de soiree, which are also garnished with plumes and flowers. These are dainty miniature headdresses made to fit closely on the top of the head, composed of gold or silver lace, with a large rose on either side. These, when arranged with the artistic skill of the Parisienne, effect an evening confure which is decidedly becoming for matinees or theater wear. They can scarcey be termed a hat, nor yet a toque, and are arranged so that they can be worn at those theaters where hats are
